

IPFaxSolution™

A Unified Communications Service.

The Top Line. Here is a cost-effective service that allows you to view your facsimile transmissions conveniently and privately via email.

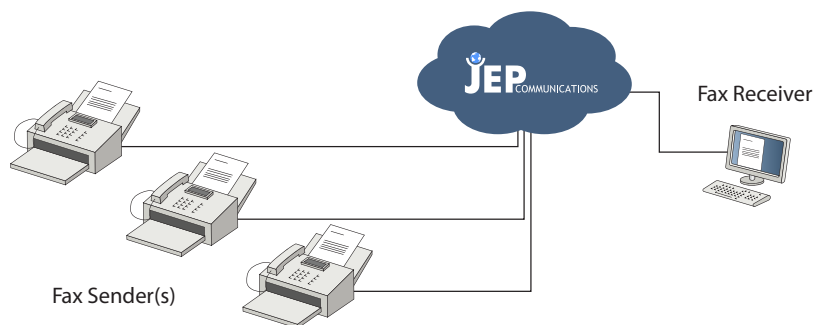

Make Your Move To A Superior Fax Solution.

JEP's new IPFaxSolution service gives your business the ability to receive incoming faxes via email. Beyond convenience, this service ensures the privacy of your communications. You can also economically bundle this service with the many other productivity-enhancing features you receive from Jep's Hosted VoIP service.

How IPFaxSolution Works.

When you sign up for our IPFaxSolution service, you are assigned a DID (Direct Inward Dialing) number that can mimic the tones of a fax. When a fax machine dials the phone number corresponding to the IPFaxSolution DID number, the proper signals are sent to the fax machine to allow the fax transmission. The transmission is then converted into a PDF image file, attached to an email and sent to your designated inbox.

The diagram above illustrates the concept of IPFaxSolution, wherein your Small Business customer is the fax receiver, and can access any number of facsimile transmissions from any number of senders via his/her email.

The Bottom Line On IPFaxSolution.

IPFaxSolution is a convenient, cost-effective and secure service. With it, you can:

- receive faxes directly in your email account
- access faxes, as long as you can access your email
- read your faxes in the privacy of your email account
- archive emailed faxes electronically, creating easier filing and documentation
- forward emailed faxes to multiple parties with the touch of a button
- buy as few as a single fax number
- receive up to 150 incoming pages for a modest monthly recurring fee

Because JEP is a nationwide telephone company, you can preserve a consistent and professional image with a fax number in the area code of your choice, and port your existing fax number (as well as the existing E-FAX number) to our network. Also, because you are working with a JEP reseller, you can bundle IPFaxSolution as part of our larger Hosted VoIP service that includes VoIP phone service, nationwide and international long-distance and a full suite of other productivity-enhancing features.

Make Your Move. Call Us At (877) 785-8647 To Find Out More About IPFaxSolution And The Entire Portfolio Of JEP Services.

JEP is a nationwide Voice-Over-the-Internet Protocol (VoIP) provider that delivers enhanced IP solutions and the services that support them to small and medium-sized businesses through a delivery channel of strategic partners.
